Of CAT and Context

- Context-awareness is the quality of **being aware of the physical/virtual** environment or the circumstances that characterize a situation or an entity.
- Context is a variable that can **intelligently guide** the development of an activity, an application, a service.

Of CAT and Context

- CAT goal is to foster research's attention on the **possibilities**, and **threatens** as well, that the usage and the management of contextual data cause to emerge in different application domains in concern with **trust, security, and privacy**.

Augmented Reality

- The use of GPS location information and compass
- Wikitude
- Layar Reality Browser on Android
- Nearest Tube on i-Phone
- MARA on Nokia phones

Augmented Reality

Context-aware SatNav

The use of real time traffic information,
and user's habits and preferences in
routes planning

Energy Meterings

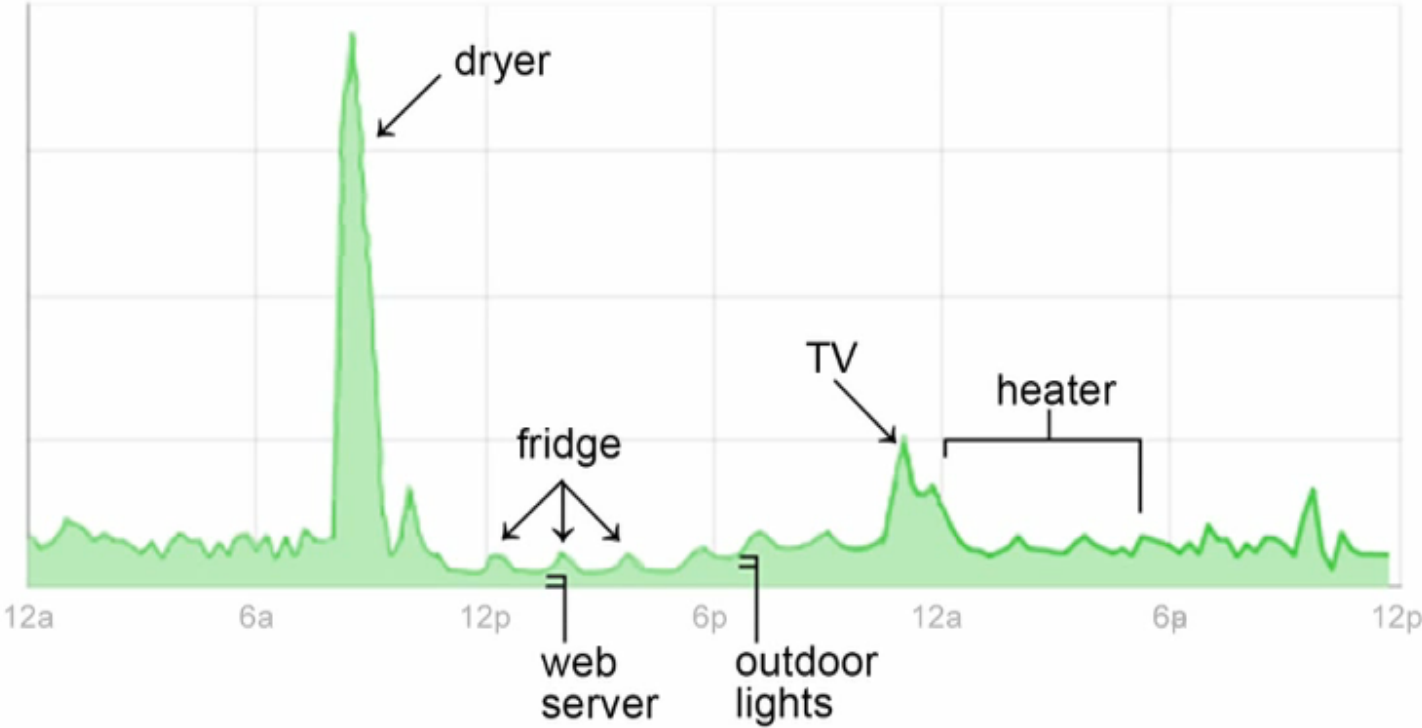

- Location, Time, and Energy consumption/production

- Behavioral Patterns

Home Electricity Use
